

## I CLAIMS

1. A Hydraulic compression spring compressor (20) comprising:
- a stable prime base (1);
  - 5 a transposable base (2) attached to said stable prime base (1);
  - a hydraulic bottle jack (3); attached to said transposable base (2);
  - a plurality of guide bar (4); attached to said stable prime base (1);
  - 10 a shiftable pressing lower bracket (5); movably attached to plurality of guide bar (4);
  - a plurality of slider guide (6) fixed to said shiftable lower bracket (5);
  - a inalterable upper bracket (7) and;
  - 15 a locking plate (8) securing the compression spring.
2. The Hydraulic compression spring compressor according to claim 1, wherein said a transposable base (2) is detachable.
3. The Hydraulic compression spring compressor according to claim 1, wherein the guide bar is hollow and threaded.
- 20 4. The Hydraulic compression spring compressor according to claim 1, wherein said locking plate is detachable.
